PROFILE

Graduate Software Developer with a First-Class Honours degree in Software Development and hands-on experience building, testing and deploying full-stack applications using React, TypeScript, JavaScript, Node.js, Python and SQL. Experienced working independently and within Agile teams across frontend, backend, REST APIs and databases, with exposure to CI/CD, application security and cloud technologies. Strong analytical problem solver who enjoys debugging complex issues and developing reliable, user-focused software. Comfortable collaborating with technical and non-technical stakeholders, taking ownership of tasks and supporting other developers. Adaptable and curious, with a strong motivation to learn new technologies and grow as a software engineer.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Additional Programming Experience: Java, C#

Frontend: React, Next.js, HTML5, CSS3, Sass, Tailwind CSS, Responsive Web Development, UI/UX Design

Backend & APIs: Node.js, Express, Flask, REST APIs, API Integration, JWT Authentication

Databases: PostgreSQL, MySQL, Oracle SQL, Database Design

Testing & Quality: Jest, React Testing Library, Unit Testing, Functional Testing, Black-Box Testing, White-Box Testing, Debugging, Troubleshooting

Application Security: Burp Suite, Web Security Testing, SQL Injection, XSS, Secure Coding

DevOps, Cloud & Deployment: CI/CD, Docker, Kubernetes, AWS, Google Cloud Platform, Render, Application Deployment, Web Hosting, Application Maintenance

Tools & Practices: Git, GitHub, Agile/Scrum, Technical Documentation, Test Planning, Cross-Functional Collaboration, Technical & Non-Technical Communication

AI-Assisted Development: Claude, Prompt Engineering, AI-Assisted Coding, Debugging

PROJECTS

Blockchain Healthcare Management DApp | *Individual Honours Project*

React, Solidity, ethers.js, IPFS, Ollama AI, Privy, Ethereum | [GitHub](#) | [Live Demo](#)

- Developed an honours final-year healthcare DApp using React, Solidity and Ethereum, with IPFS for secure off-chain medical data storage.
- Identified crypto wallet complexity as a usability barrier for non-technical users and integrated Privy to provide simple email authentication and remove the need to manage cryptocurrency directly.
- Integrated local AI with Ollama for data privacy, and applied functional and unit testing using a test matrix while producing technical documentation.

GCU Indoor Map – GCU Campus Guide | *5-Person Agile Team Project*

React, Python, Flask, REST APIs, JWT, Docker, Render | [GitHub](#) | [Live Demo](#)

- Led frontend development within a five-person Agile team, collaborating across frontend and backend development throughout the project.
- Designed and developed responsive React interfaces and integrated them with a Python Flask REST API.
- Developed user and administrator workflows with JWT-based authentication for controlled application access.
- Collaborated across frontend and backend development to integrate application functionality and resolve implementation issues.
- Contributed to deployment using Docker and Render, supporting delivery from development through to a deployed application.

Fitness Tracker App | Individual Project

React, TypeScript, Node-RED, Supabase, PostgreSQL | [GitHub](#) | [Live Demo](#)

- Developed a real-time fitness dashboard using React and TypeScript with interactive health and workout tracking features.
- Integrated simulated IoT sensor data through Node-RED to support real-time application data.
- Implemented workout logging, mood tracking, soreness heatmaps and streak analytics.
- Used Supabase and PostgreSQL to manage and persist application data.

Laptop Loop | Agile Team Project

Full Stack Development, Agile | [GitHub](#) | [Live Demo](#)

- Collaborated in an Agile development team to build a full-stack platform connecting asylum seekers with laptop donors during a four-week development sprint.
- Developed functionality for automated laptop matching, reassignment and request tracking.
- Contributed to an administration dashboard and browser notification functionality supporting application management.
- Worked across frontend and backend development to deliver the application within the project timeline.

Womennetic | Individual Freelance Project

Aug 2023

React, Node.js, Express | [GitHub](#) | [Live Demo](#)

- Independently developed a full-stack web application using React and Node.js/Express as a freelance project.
- Managed the application end-to-end from development through production deployment.
- Launched the completed application on a custom production domain.

Sensational Life | Team Project

React, Node.js, Express, PostgreSQL | [GitHub](#) | [Live Demo](#)

- Collaborated on a full-stack application developed with React, Node.js, Express and PostgreSQL.
- Contributed across frontend and backend development, including application functionality and secure user data handling.

Corona Tracing App | Team Project

React, Express, Figma, Agile | [GitHub](#) | [Live Demo](#)

- Developed a COVID-19 information and contact-tracing application as part of a collaborative bootcamp project.
- Built frontend functionality with React and integrated it with an Express backend.
- Used Figma during the UI design process and collaborated with the team using an Agile development workflow.

TECHNICAL EXPERIENCE

Volunteer Tech Assistant

Nov 2022

Code Your Future

Glasgow, UK

- Mentored trainees working on a collaborative graduation software project focused on ASD diagnosis awareness in Scotland.
- Supported developers with debugging, codebase understanding, problem solving and peer learning within a collaborative development environment.
- Worked with team members using React, CSS, Node.js and PostgreSQL.
- Helped trainees understand implementation issues and work through technical problems during development.

EDUCATION

Glasgow Caledonian University

Glasgow, UK

BSc (Hons) Software Development – First Class Honours

2026

- Awarded First Class Honours in Software Development.
- Developed practical experience in software development, problem solving, collaborative project work and software engineering fundamentals.

Glasgow Clyde College

Glasgow, UK

HND Software Engineering with Emerging Technologies

Sep 2023 – Jun 2024

Glasgow Clyde College

Glasgow, UK

HNC Computing

Sep 2022 – Jun 2023

Code Your Future

Glasgow, UK

Full Stack Developer – 9-month Programme

Nov 2021 – Jul 2022

Hack Your Future

Brussels, Belgium

Full Stack Developer – 9-month Programme

Oct 2019 – Jun 2020

EMPLOYMENT

Dispatch Operations Assistant
Trespas

Dec 2024 – Present
Glasgow, UK

- Coordinate outbound dispatch operations, ensuring orders are processed accurately and within required timelines.
- Prioritise urgent requests, resolve operational issues and communicate effectively with internal teams.

Customer Service
Shahed's Original

Sep 2022 – Jan 2025
Glasgow, UK

- Provided professional customer service in a busy working environment and handled customer queries efficiently.
- Supported daily operations while applying communication, teamwork, prioritisation and time-management skills.

VOLUNTEERING

Volunteer Tech Assistant
Code Your Future

Nov 2022
Glasgow, UK

- Mentored trainees on a collaborative software project, supporting debugging, codebase understanding and problem solving.
- Collaborated with team members using React, CSS, Node.js.

Community Volunteer
KinKitchen

2022
Glasgow, UK

- Supported the preparation of food for the local community, working collaboratively with other volunteers.

Shop Volunteer
Oxfam

2021
Belfast, UK

- Assisted customers with purchases and operated the till, providing friendly and efficient customer service.

SOFT SKILLS

- Analytical Problem Solving & Critical Thinking
- Collaboration & Teamwork
- Communication – Technical & Non-Technical
- Self-Management, Initiative & Accountability
- Adaptability & Continuous Learning

Languages: Arabic, English
