Full Stack Development

Profile

Front End / Full Stack Software Developer based in Glasgow with a First Class Honours degree in Software Development and hands-on experience building responsive web applications using React, TypeScript, JavaScript, HTML, CSS/Sass, Node.js and REST APIs. Experienced in delivering applications across Agile team, freelance and collaborative projects, including leading frontend development and integrating user and admin workflows with backend services. Strong in reusable UI development, API integration, debugging, responsive design, Git-based collaboration and problem solving, with additional experience in PostgreSQL, Docker, AWS and Kubernetes.

EDUCATION

BSc (Hons) Software Development, Glasgow Caledonian University, Glasgow, UK

2026 – 2026

Awarded First Class Honours in Software Development. Focused on practical software development, problem-solving and collaborative project work through hands-on application building and software engineering fundamentals.

HND Software Engineering with Emerging Technologies, Glasgow Clyde College, Glasgow, UK

SEPT 2023 – JUN 2024

HNC Computing, Glasgow Clyde College, Glasgow, UK

SEPT 2022 – JUN 2023

Full Stack Developer (9-month programme), Code Your Future, Glasgow, UK

NOV 2021 – JUL 2022

Full Stack Developer (9-month programme), Hack Your Future, Brussels, Belgium

OCT 2019 – JUN 2020

PROJECTS

Wommenetic

AUG 2023 – 2023

Solo freelance full stack project built using React and Node.js/Express. Developed and launched the application end to end and deployed it to production with a custom domain.

GCU Indoor Map - GCU Campus Guide

[GitHub](#) | [Live Demo](#)

Led frontend development within a five-person Agile team building a campus navigation application. Developed responsive React interfaces and integrated frontend functionality with a Python Flask REST API. Integrated user and administrator workflows, including JWT-based authentication. Collaborated across frontend and backend development using an Agile delivery process. Contributed to deployment using Docker and Render.

Fitness Tracker App

[GitHub](#) | [Live Demo](#)

Built a real-time fitness dashboard using React and TypeScript. Integrated simulated IoT sensor data through Node-RED. Developed workout logging, mood tracking,

soreness heatmap and streak analytics features. Used Supabase and PostgreSQL for application data management.

Laptop Loop

DEC 2021

[GitHub](#) | [Live Demo](#)

Built a full-stack platform connecting asylum seekers with laptop donors during a four-week Agile team sprint. Developed functionality for automated matching, reassignment and request tracking. Contributed to an administration dashboard and browser notification functionality. Collaborated across frontend and backend development in a fast-paced team environment.

Sensational Life

[GitHub](#) | [Live Demo](#)

Collaborative full-stack web app built with React, Node.js, Express and PostgreSQL, with secure user data handling and cross-functional frontend and backend contribution.

Corona Tracing App

NOV 2019

[GitHub](#) | [Live Demo](#)

Developed a real-time COVID-19 information and contact-tracing application as part of a bootcamp team project. Built frontend functionality using React and integrated it with an Express backend. Used Figma as part of the UI design process. Delivered the project using an Agile team workflow.

EMPLOYMENT HISTORY

Volunteer Tech Assistant, Code Your Future, Glasgow

NOV 2022

- Mentored trainees on a graduation project focused on ASD diagnosis awareness in Scotland.
- Supported debugging, codebase understanding and peer learning in a collaborative team environment.
- Worked with React, CSS, Node.js and PostgreSQL.

Dispatch Operations Assistant, Trespass, Glasgow

DEC 2024 – PRESENT

- Coordinated outbound dispatch operations and kept orders moving accurately and on time.
- Prioritised urgent requests, resolved issues quickly and communicated with internal teams.

Customer Service, Shahed's Original, Glasgow

SEPT 2022 – JAN 2025

- Provided customer service in a busy environment, handling queries professionally and efficiently.
- Supported daily operations and built communication, teamwork and time management skills.

SOFT SKILLS

Problem solving and critical thinking

Strong software engineering fundamentals

Clear technical and non technical communication

Cross functional collaboration and teamwork

Ability to work across frontend and backend technologies

Debugging and analytical thinking

Adaptable and quick to learn new technologies

Ownership and independent problem solving

Mentoring and peer support

Prioritisation and delivery under pressure
